

This article will offer three free tools that can help you reset your Samsung printer toner cartridge, and it might just be the best thing you've ever done for your print and copy machine. Just like a car or a bicycle, printers require regular maintenance to keep them running smoothly. Every so often, however, they need to be taken in for service which is also known as toner replacement. A toner cartridge consists of several colors of ink which are housed in one container and is driven by an electro-magnetic drum scanner. When the scanner gets low on ink while printing or copying documents, it will turn into a constant clicking noise while clicking over the drum motor trying to find more ink that it needs. The toner cartridge for a printer has a sensor which measures the amount of ink in the print cartridge and notifies its user when it's time to change it out. So, whether you need to fix broken printer toner, incompatible cartridges or just want to make sure you are using the right type of ink for your specific printer, here are some very useful tools that can help you do all these things with ease. Best Free Samsung Scx-3400 Toner Reset Software This is one of the most popular programs on the Internet today due to its ease of use and ability to reset Samsung printer toner cartridges with no hassle at all. It works on a number of different models and brands, including Samsung, Dell, HP and Brother printers. The process is very simple. Just go to the website and download the program right to your desktop. Next you install the application by running the "Samsung Toner Reset Tool Installer" file. It will open a new window with a short user manual, so be sure to read it before you continue. Once you are ready, plug in your printer (if it's not already connected), restart your computer and open the software by clicking on your "Start" button on your PC screen. The headings on the screen will tell you how to enter the settings for your particular printer model. Generally, you need to enter the printer model number followed by "reset" or "reset toner". Next just click on "Start Reset". Once the page has loaded, all you have to do is print one test page by clicking "Print Test Page" which will appear on the screen after ensuring all of the necessary components are connected properly and installed properly. You can choose whether or not to save or print it. If you chose to save it, click on "Output" and then select your desired folder. Click on OK when done. Click on "Print" again and choose Printer Properties from the drop down menu. Then select Toner Levels and click on "Set...". Highlight the option you want to select (usually Standard) and click OK. Again, choose Print or Save and print a test page by clicking the "Print Test Page" button. Once you are satisfied that everything is working properly and correctly, save and close the program by clicking "OK". Go to Device Manager and make sure your printer is recognized in there as well.
