USB Drive Cleaner is a user-friendly utility developed mainly to protect your computer from the effects of viruses and other malicious programs on USB storage devices. It also allows you to remove any unwanted content from a Flash drive, ensuring your personal data is safe. Once installed, the program runs minimized in the system tray, enabling you to access it whenever you need it. It also shows you an overview of your connected USB devices, so you can quickly choose the drive you'd like to clean. With USB Drive Cleaner, you can securely delete all files, folders and registry entries from a Flash drive without affecting the remaining data or its structure. The software can detect and delete all typical viruses, such as those of the trojan, keylogger, adware and spyware types, as well as all the other malware that can infect your Flash drive. The program also enables you to remove embedded content from your USB drive, as well as recover deleted files from Flash media. USB Drive Cleaner can save your data even when the drive is infected by a virus or other malware, by using internal, temporary storage on your computer. USB Drive Cleaner also lets you remove all unwanted files or even automatically perform a drive scan. After that, you can view all files that have been deleted, even if they have been moved to a different directory, or to a different volume. The 'Drive Settings' section of USB Drive Cleaner enables you to allow, block or disable the usage of a Flash drive connected to your computer, as well as the ability to write data on them. You can also choose the size of the temporary storage area that USB Drive Cleaner uses, and the folder in which the temporary files will be stored. The 'Media Clean' function provides you with a simple and reliable solution for erasing your USB Flash drive, which can be activated even when you're using a third-party media-erasing application. Features: - Detects all typical malware, such as keyloggers, trojans, adware and spyware- Blocks the installation of a program on a USB Flash drive- Detects malicious files on a drive- Automatic detection of a virus and removing all related elements- Removes all embedded content and viruses- Allows you to create a blacklist and whitelist- Enables you to clean a specified drive- Restores deleted files- Detects invalid files on a drive, prevents further damage- Enables you to perform a drive scan and view all deleted files- Det

What's New in the USB Drive Defender?

USB Drive Defender is a user-friendly software solution developed mainly to offer you a reliable means of protecting your computer from the effects of viruses and other forms of malware originating from USB devices. The program is rather easy to use, and once you install it, it runs minimized in the system tray, enabling you to access it whenever you need it, but otherwise not interfering with your activities. One of USB Drive Defender's main components is the 'USB Shield', which provides you with heuristic protection, by monitoring all connected portable storage devices and allowing you to delete all encountered threats automatically. The 'USB Scan' function enables you to analyze the contents of a Flash drive and determine whether it poses any risk for your computer. It discovers viruses and other malware, allowing you to dispose of them with just one click. Moreover, USB Drive Defender offers a 'Fix System' tool that can detect any system errors as well as file association problems caused by previous virus attacks. You can select the items that interest you and repair them. From the 'USB Settings' section, you can disable the usage of any portable storage devices or the ability to write data on them. In addition, you can disable the 'Autorun' feature of all USB drives you connect to your PC. USB Drive Defender even lets you to create a blacklist and a whitelist, containing the names of the restricted and permitted devices. Other functions include the 'Process Manager'; the 'Autostart List' that lets you stop certain applications from running at Windows startup; the 'Search and Destroy' tool allows you to select a folder, scan it and delete all malware traces from it. Description: USB Drive Defender is a user-friendly software solution developed mainly to offer you a reliable means of protecting your computer from the effects of viruses and other forms of malware originating from USB devices.
