The present invention relates to apparatus for illuminating a field of work or the like and more particularly to an easily operated and inexpensive portable lighting apparatus. A number of lighting apparatus of the above mentioned general type are known in the art. Light sources for such apparatus are generally formed as separate means and are introduced into the apparatus. While the light source may be stationary, it is usually mobile. In prior art light sources, the introduction of the light source into the apparatus is complicated and expensive. Known light sources are formed as separate units which are relatively expensive, particularly if long-life, durable lamps are desired. Thus, they are prone to breakage and often require special equipment for transporting and installing them.
