The latest version of AutoCAD is called AutoCAD 2017, and the AutoCAD 2017 Reference and Updates Guide is a comprehensive reference for the latest version of AutoCAD. Introduction The following is a comprehensive and updated guide to AutoCAD 2017. AutoCAD is a widely used commercial computer-aided design (CAD) software application, originally developed and marketed by Autodesk. AutoCAD is a part of the Autodesk Revit family of CAD and modeling software. The software was originally sold and licensed as AutoCAD for the Apple II and IIX, and as AutoCAD LT for the DOS operating systems. AutoCAD has been continually developed over the years and new releases are announced every year. The latest version of AutoCAD is called AutoCAD 2017, and the AutoCAD 2017 Reference and Updates Guide is a comprehensive reference for the latest version of AutoCAD. The software is also available as mobile and web apps. Similar to the previously released CAD software by Autodesk, AutoCAD 2017 is available in a Standard, Architectural, Web and Mobile app versions. The differences among these applications and their usage are explained in detail in the AutoCAD 2017 Reference and Updates Guide. AutoCAD 2017 is a member of the AutoCAD family of CAD software, and is released every year in April. With the release of each new version, several updates are usually included in the new version. The AutoCAD 2017 Reference and Updates Guide covers all the new and updated features available in the latest version of AutoCAD 2017. Features AutoCAD is a feature rich desktop-based CAD software. Table 1 lists all the features of AutoCAD 2017 and its components. The table also lists the features available in the latest versions of other Autodesk products. (Table 1) This section introduces the features of AutoCAD 2017. For the detailed and comprehensive information about AutoCAD 2017, you may refer to the AutoCAD 2017 Reference and Updates Guide. A CAD application is a set of software tools used to design and generate CAD drawings and technical drawings. In the context of AutoCAD, CAD is a broad term and refers to any of the following: Mechanical CAD (CAD) that is used in manufacturing of mechanical products and facilities, including tools, machines, tools and equipment. Users with limited AutoCAD knowledge, who wish to create their own drawings, can use a cloud-based drawing creation tool, Autodesk Studio, which is now compatible with AutoCAD 2014 and can produce AutoCAD drawings. AutoCAD is delivered in several forms, including the version that is sold by Autodesk directly and the version of AutoCAD that is available free of charge to users of Autodesk software and licenses. The two main forms are AutoCAD, which is delivered as software, and AutoCAD LT, which is delivered as a standalone product. The two products are different and complementary. AutoCAD is delivered in several versions, each targeted at a specific market segment. These include: AutoCAD LT AutoCAD Mechanical AutoCAD Architecture AutoCAD Civil 3D The versions are targeted towards a variety of users, including engineers, architects, drafters, contractors and students, and vary in their complexity, market price, and hardware requirements. Libraries AutoCAD Architecture (which is a plugin for AutoCAD LT) includes a number of libraries that can be used to extend AutoCAD in a similar manner to a language such as Visual Basic for Applications. These include: AForge.net,.NET assembly for Autodesk Exchange, an add-on for AutoCAD LT. This assembly provides components to work with the features of Autodesk Exchange and AutoCAD LT. ADLS, a DirectX 11-based game engine for architectural visualization and design, including real-time animation, video, 3D models, rendering, and rendering support for AutoCAD LT. ADLS supports a multitude of architectural rendering and design softwares such as Adobe Photoshop and Adobe After Effects. ADNUI, AutoCAD navigation user interface, AutoCAD plug-in that renders a cursor and a 3D virtual window in 2D and 3D view. ADNUI-Lite, a lightweight, free version of ADNUI, a component of AutoCAD Architecture. Core, a set of C++ classes used to provide the Core Functionality of Autodesk Exchange and AutoCAD LT. WinRT,.NET class library that represents the functionality of Autodesk Exchange and AutoCAD LT. Extensions AutoC 5b5f913d15

Joint leading operators in Queensland, TAFE Queensland and the University of Queensland are aiming to be carbon neutral by 2030 with the launch of a new joint Green Flags initiative. The Green Flags aim to embed sustainable behaviour into everyday work practices, through research, development, collaboration and education. Green Flags is the joint initiative between TAFE Queensland, the Queensland University of Technology, Queensland's leading joint training provider and industry. The Green Flags initiative is building on the success of the existing Climate Ready curriculum and has been created to reinforce the new Climate Ready qualifications and align with TAFE Queensland's Green Flags Plus initiative. The new curriculum will prepare students to be effective leaders and effective decision-makers in a future green economy. It is also the opportunity for TAFE Queensland to raise and reinforce sustainability awareness within the workforce to equip them with the skills and knowledge needed to be effective leaders and effective decision-makers. The Green Flags program will include a range of courses that will cover a diverse range of topics and will be delivered by leading industry and

University experts and supported by TAFE Queensland's leading industry partners. "This program will be delivered through traditional and distance education and will provide students with the opportunity to develop their skills and knowledge to be effective leaders and decision-makers in a green economy," TAFE Queensland CEO, Dr John Brumby said. "These courses will provide the platform for students to develop the knowledge, skills and attitudes needed to be effective leaders and decision-makers in a green economy." TAFE Queensland's director of curriculum services, Professor Gareth O'Keefe said the new Green Flags curriculum would be underpinned by best practice and evidence and delivered through an accredited academic route. "TAFE Queensland has a strong track record of delivering leading edge
