Wondershare MobileTrans is a mobile device management software that makes it possible for users to transfer data between iOS and Android devices, as well as other . The specific and complete characterization of a novel locus containing the cow and sheep loci (ctlr) has led to the cloning of a sheep homolog. Identification of the sheep ortholog of the cow CTCR (CTCRA) provides an opportunity to investigate the effects of heterozygosity at the sheep homolog on animal behavior and welfare. The hypothesis to be tested is that CTCRA expression leads to an altered phenotype in sheep. An absolute QTL has been identified, and a microsatellite has been developed from the sheep locus that will be used for mapping the QTL in other breeds. The CTCR locus of cattle is located on chromosome 13, the sheep locus on chromosome 2. Reorganization of sheep chromosomes in the past decade has moved the homolog of chromosome 13, carrying the CTCR locus, to chromosome 3. Thus the sheep locus of chromosome 13 and the sheep CTCR protein will be mapped on sheep
