With FIFA, players can feel and breathe every moment of their FIFA 22 experience with each ball and experience that comes from millions of player movements. The new game engine allows game developers to re-write the rules of the game in real-time based on an infinite number of permutations, creating never-before-seen gameplay. What you see is now possible. FIFA 22 introduces seven new game modes: Career Mode and Ultimate Team (PC and Xbox One) FIFA Ultimate Team is the biggest eSports scene of all-time. Ultimate Team is the biggest eSport in the world with over a billion player hours played. If FIFA Ultimate Team sounds familiar, it's because it's also the game mode in FIFA 15. The mode was an excellent eSports mode that gave players the chance to unlock a whole bunch of new cards, create their own Ultimate Teams from scratch, face off against real-life competitors, and spend fun-filled hours finding the perfect cards to create their dream team. Now, in FIFA 22, Ultimate Team is even bigger and better. It's also the number one ranked eSport in the world and has been for years. If you love FIFA Ultimate Team, you're going to love FIFA 22. Over 150 new players, new kits, new careers, and more! FIFA 22 introduces an all-new

scoring system that plays to the strength of soccer. Instead of the old points system, players now score for goals and other notable actions. Since this system favors players who are dangerous, aggressive, and take risks, it has also opened up new opportunities for creative plays, aerial duels, and dramatic finishes. You no longer score points if you don't do anything, but you get more "boost" for big goals, big saves, and thrilling finishes. The new FIFA 22 gameplay engine

One of the most exciting changes in FIFA 22 is the new engine that powers the gameplay. The "Playmaker" engine is the largest evolution of FIFA in a long time, with unprecedented levels of customization and unparalleled game integrity. With the new engine, the rules of soccer are forever changed. FIFA 22 introduces "HyperMotion Technology," which uses motion capture data collected from a complete, high-intensity football match in motion capture suits. The data collected from player movements, tackles, aerial duels, and on-ball actions is used to power FIFA

What's new:

- **HyperAdaptive Motion Capture.** With "HyperAdaptive Motion Capture" (HAMC), an innovative method of recording player biometrics and movements, we are able to capture movements not just on the pitch, but in off-field environments, allowing us to make more accurate player animations. And by leveraging the influence of training, we can also help footballers improve in a more realistic and natural way.
- **5 Seconds of Magic.** Exploring the five seconds before a goal gives players in matches or training sessions the option to make more intuitive and adaptive decisions. By sharpening these skills, players can improve their on-pitch finishing accuracy.
- **Match Engine.** Refining the game's match engine creates more realistic goalscoring chances and we've reactivated the button prompts for a more interactive experience.
- **Vägen till Tifo.** Giving players the option to choose between playing as a team or experience Real Football, now in FIFA every decision and goal in a match is interactive.
- **First-Person Faking.** Start and finish your moves with more comfort and control by creating the most life-like player

-
- animation in the game with first person faking.
- **Team Formations.** Focusing on the tactical game of football, the new team formations allow you to play out an entire match with 11 players without having to set-up each formation with different starting line-ups.
 - **New animations.** Viewers can experience real football life with completely new player models, ball-tracking behavior and much more, including new player reactions to control and new on-field animations.
 - **MLS, China and FA International set pieces.** Even more MLS, China and FA Championship fixtures in addition to FA Community, FA Women's and FA Trophy games. Plus, the entire UEFA Champions League group stage and matches from the UEFA Europa League and UEFA Cup.
 - **New Stadiums.** With the game's largest catalog of 350+ new stadiums the worlds and brands are ready for their entry into the EA SPORTS football roster, including 103 from FIFA 18, 74 from PES 2018, 64 from NHL, 43 from Madden NFL and 16 from NHL Ultimate Team.
 - **New Autos.** Whether it's the fastest player, the best passer or the kicker with an eye on the top job, use Autos

FIFA is an association football (soccer for the U.K.) video game franchise, developed by Electronic Arts. The series, which began in 1985, is the best selling sports video game franchise of all time. In 2007 EA Sports released the first game featuring improved gameplay, online play, licensed teams and more. The new FIFA is now in the latest generation of consoles and new with a number of gameplay and features

improvements. The previous game for the new generation consoles introduced player traits to create more realistic gameplay. Players can now be creative and use five different methods to build a midfield, including formation, player type and position. FIFA is a true sports game and plays to the strengths of FIFA. It is not a simulation video game. FIFA allows players to truly execute their tactics and compete with their teammates. You can play FIFA in any of its eight camera angles and as a goalkeeper. Along with FIFA Ultimate Team™, FIFA is one of the most popular games on the App Store. FIFA and iOS The FIFA franchise has been available on a number of platforms for over two decades, including the original PlayStation, Game Boy, Nintendo 64, Dreamcast, PlayStation 2, Xbox, Nintendo DS, Nintendo DSi, iOS (iPhone, iPad and iPod touch), Android and Xbox 360. The latest game in the FIFA series for the latest generation consoles and iOS is FIFA 21. A number of high-profile football games have also been developed for iOS, including "FIFA the game" and "FIFA Mobile" - the official games of the global sport - and the FIFA Classics series, including "FIFA 99" (developed by EA Sports) and "FIFA 14" (developed by EA Canada). FIFA games offer

a variety of game modes, including online and offline single-player competitions, exclusive gameplay on iOS devices and a fun, free-to-play-only game. FIFA games are highly realistic and the most popular football game series for iOS. Why is it important to develop FIFA for iOS? While iOS has experienced a recent surge in popularity, having been downloaded almost 30 million times in less than a year, the platform still does not support all iPhone hardware and only 4.9 percent of App Store users are still downloading games. "We decided to make a FIFA game for iOS after seeing the growth of the iOS platform and the huge demand for the Football franchise on the mobile platform," said Alex Young, CMO
