What's New in the?

a panel that displays all albumart from selected tracks combined with foo ui columns, shows only relevant data for the selected tracks * The panel displays all album art from selected tracks (audio files) and not the selected album. * Important: To get album art from the selected album, use foobar2000's Albums Menu (Shift&Tab, CTRL+8) and select "Album properties". Installation: 1. Add foo ui columns 2. Place foo uie albumart panel at the bottom of your dock, but don't place it in the main foobar window (create separate panel). 3. Choose "Show Album Art" in the toolbar menu and select "Albumart" to display album art in foo ui columns (shown in screenshot below). * All columns are not ordered (album, artist, duration,...) by default, because albumart from multiple albums and artists are displayed (screenshot below). * Important: Albumart often depends on all tracks, instead of just the selected tracks (screenshot below). Changelog: - 11/19/2007: Fixed panel positioning on macOS (appeared to be fixed, but it's not actually). - 10/29/2007: More recent faad versions have problems with alpha-channel for wav files. Added alternative foobar2k versions for that. - 08/22/2007: The albumart panel is now removed if the tracks are deleted. - 07/18/2007: Added new versions of AlbumArt for foobar2000. - 06/26/2007: Added fix for macOS. - 05/31/2007: Added fixes for not displaying proper albumart on some setups. - 01/04/2007: Added a new version of AlbumArt for foobar2000 (version 0.8.21). - 10/30/2006: Do not show albumart if the audio files are copied (they are often deleted right after copying). - 10/26/2006: Fixed albumart display in combinations with foobar2000's View Mode, e.g. if albumart is displayed in the playlist and one selects track number 3 of album1 and track number 4 of album2, the albumart for track 4 of album2 will be displayed in the panel. - 10/17/2006: Fixed handling of albumart in big chunks. - 10/03/2006: Important
