invoice money to your clients? We offer all sorts of construction related services on. To stop fake invoices there must be used best ready to action means for avoiding them.. Building is a very process that demands fast as well as qualified services that.

Q: Concatenate two lists while maintaining a timestamp that indicates the start date in the order the list should be concatenated I have two lists with different lengths

```
var first = new List { new DateTime(2017, 1, 20), new DateTime(2018, 1, 20), new DateTime(2019, 1, 20) };
var second = new List { new DateTime(2017, 1, 20), new DateTime(2018, 1, 20), new DateTime(2019, 1, 20) };
```

How can I combine these two lists by maintaining the order, but concatenating in chronological order?

A: List combined = `first.Concat(second).Distinct().OrderBy(d => d)`; That's it. It orders all elements inside first list inside second list. You can remove `Distinct` from the call if you want to preserve the order in the result list.

Q: How can I print a triple number in one line? I want to print 1,8,9 but the console says that it's 'out of range'. I've tried dividing the numbers by 10 and adding a comma like so: `for (var i = 1; i`

## Offline Map Maker 8.032 Full Key [update 5 19 2019]

A: You could try to pass the deviceToken to the store when registering the device, like this:

```
NSMutableDictionary * authParams = [[NSMutableDictionary alloc] init];
```

```
authParams[@"device_token"] = deviceToken; [[NSUserDefaults standardUserDefaults]
```

```
setValue:authParams forKey:@"auth"]; [[NSUserDefaults standardUserDefaults] synchronize];
```

Assuming the device is registered with the current user, you should be able to access this value in the authentication results callback. Q: programmatically open new Tab in Titanium app i'm building

an app using the titanium module 2.2.2. to open a new tab in Chrome I call: var ww =

```
Ti.UI.createWindow({title:"", url : '/hello/1'}); var tab = Ti.UI.createTab({title: 'Tab'});
```

```
ww.addTab(tab); tab.open(); however, once the application loads I get the error: Failed to create tab.
```

How can I open a new tab programmatically, or is there another way to do this? A: You have to add

the tab programmatically with the right url. Here is a example: var tab = Ti.UI.createTab({ title: 'My

```
New Tab' }); tab.url = 'about:blank'; titanium.app.addTab(tab); If you want to open a new window
```

```
you can use Titanium.UI.open: Titanium.UI.open('about:blank'); Q: How to use data annotation on
```

properties in Entity Framework 6.2 I've updated my project from EF6.1 to EF6.2 recently and now

when I try to include data annotation on my properties I'm getting an error. This project builds and

runs on EF6.1 and EF6.2 without any errors. I guess this has something to do with the rename of the

"Context", but I can't figure out where I'm going wrong. Is there anything specific for EF6.2 or am I

doing something wrong? This used to work when I was using EF6.1. public class Contact { public int
