It is important to note that this software comes with a typical 30-day trial period; in our estimation, it is not necessary to take the leap of faith before trying it out, since it does not require any unnecessary advanced parameters, settings or install files. It is compatible with all kinds of MS Windows versions and does not put any unnecessary strain on Mac computers. It is also available for PC and Mac in multilingual format, which allows users to switch between the different languages at the click of a button. The program seems to be more akin to a mini Windows-style toolkit than a traditional message board. The application also lacks a way to track messages from different people. But for the most part, it works well and seamlessly integrates with the operating system. We like the program, because it has some nice features, unlike some of its competitors. It is available for free download and is compatible with PC and Mac, Windows XP, Vista, and Windows 7. There are also some bug fixing and usability enhancements. It has a more feature-rich user interface, such as a Downloads window and a Favorites window. It has an attractive user interface, which can be displayed in its default or customized states. We were able to browse the help file. It has a nice Help file, but it could be a lot more comprehensive than it is. If you are a user of this software and have any problems, you can contact the support team and get help, free of charge. A good chat messenger is a beneficial program, whether you are using it for private communication, or for corporate. If the latter is your case, this messenger is one of the good one available. The application is free to download, lightweight and works with all sorts of mobile devices, such as iOS, Android and Windows, among others. However, if you wish to get more out of the chat messenger, you can download the paid version, which also comes in a multi-language version, with more skins, templates, backgrounds, etc.
